Rashpur Dayer manasatala, Rashpur , Amta, Howrah-711401

Summary

Data Science Graduate & Full Stack Developer from IIT Madras with expertise in Python, JavaScript, C/C++, and modern web technologies. Experienced in machine learning, database management, and end-to-end application development. Successfully delivered projects spanning data analytics, web automation, and responsive user interfaces. Seeking to contribute technical versatility and analytical skills in a corporate environment

Skills

- **Software:** C/C++, Python , Java , React.js, Next.js, Postgresql , AZURE & GCP , Django , Flask,
- DynamoDB, MongoDB
- **Soft Skills:** Project Management, Client Communication, Team Collaboration, Creative Thinking, Time Management

Education

BS in Data Science & Applications

IIT MADRAS   **2024 - 2030**

Developed proficiency in statistical analysis, data mining, predictive modeling, and data visualization techniques

B.tech. in computer science & Engineering (AI&ML)

BRAINWARE UNIVERSITY   **2024 - 2028**

Gained expertise in artificial intelligence algorithms, machine learning models, deep learning frameworks, and intelligent system design

Experience

E-Commerce Analytics Platform

Built comprehensive full-stack e-commerce platform with React frontend and Node.js backend. Implemented predictive analytics for sales forecasting, customer segmentation using machine learning algorithms, and real-time dashboard for inventory management and business insights.

AI-Powered Fake News Detection System

Developed NLP-based web application using Python Flask and machine learning models to classify news authenticity. Integrated text preprocessing, feature extraction, and trained classification algorithms achieving 89% accuracy on social media content validation.
